

Master of Integrative & Functional Medicine

A red mortar and pestle are the central focus, surrounded by a variety of fresh green herbs and small white flowers. The mortar has a white 'Rx' symbol on it. The background is white.

Teaching Integrative & Functional Medicine from a natural medicine perspective

100% On Line

Total Credits: 60

Duration: 2 Academic Years

Mandatory & Optional:
40 Credits

Thesis: 20 credits

Modality: 100% Virtual

Administration

Dr. Wayne L. Sodano
DC, DABCI, DACBN, BCTN
PROFESSOR

Dr. Charles Gant
MD, PhD
PROFESSOR

Dr. Milton Bastidas
DC
PROFESSOR

Bch Carolina Hernandez Peratta
Coordinator

Mrs. Paulina Bastidas
Coordinator (Spanish)

Mrs. Catherine Sodano
Coordinator

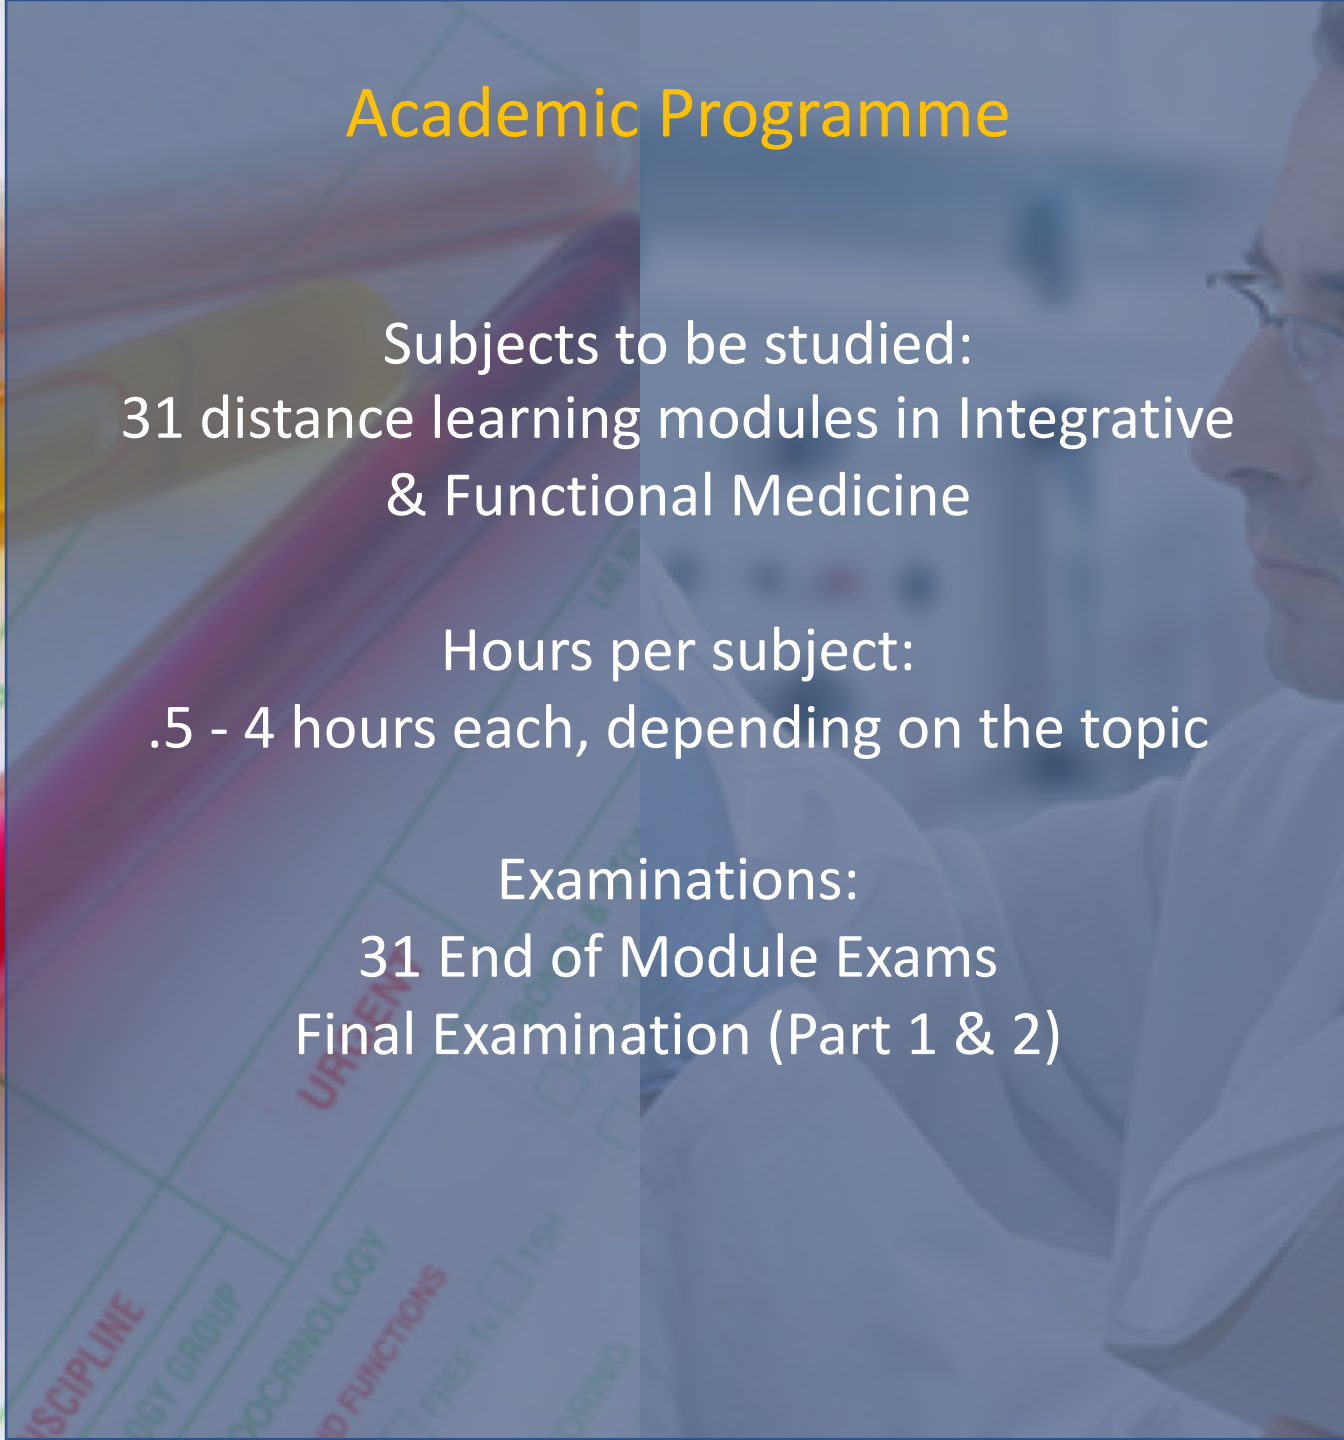

Dr. Ana Baroni. MD, PhD
Master Director

Academic Programme

Subjects to be studied:
31 distance learning modules in Integrative
& Functional Medicine

Hours per subject:
.5 - 4 hours each, depending on the topic

Examinations:
31 End of Module Exams
Final Examination (Part 1 & 2)

Training Objective

The Master's program is designed to help clinicians acquire clinical integrative health care knowledge about the nature of illness, healing, and wellness. Clinicians will learn to incorporate evidence-based, safe and ethical integrative therapies through analysis of a comprehensive patient history and physical examination, and interpretation of basic and advanced clinical laboratory tests. The goal of the program is to develop an integrative and functional healthcare expertise for the treatment and management of common acute and chronic health conditions.

Professional Outings

Students successfully completing the Master's program will obtain

1. The designation of Master of Integrative and Functional Medicine
2. The option of obtaining a Diplomate in Nutrition through the American Clinical Board of Nutrition
3. The option to apply for a PhD course

Competitive, Cutting Edge, and Evidence Based Curriculum

Introduction to Integrative Medicine

Basic Concepts of Functional and Integrative Medicine * Vitamins
Nutrient and Toxic Elements * Amino Acids * Toxicants and Detoxification * Genomics
Organic Acids * Fatty Acids * Hormones and Neurotransmitters * Gastrointestinal Function
Patterns Analysis * The Inflammatory Process and Clinical Implications

Integrative Cardiology

Energy Metabolism and Disorders of Aberrant Energy Production
The Healing Encounter and Clinical Application of Integrative Medicine
Insulin Resistance Continuum and Diabetes
Osteoimmunology and Osteoporosis * Clinical Laboratory Medicine
Clinical Laboratory Medicine: ECG, Phonocardiography, Peripheral Vascular Sonography
Assessment * Treatment of Anemia * Integrative Gastroenterology
Environmental Disease and Detoxification * Integrative Immunology
Integrative Oncology * Nutritional Medicine and Advanced Clinical Nutrition
Dermatology and Periodontal Disease * Integrative Endocrinology
Pediatrics: An Integrative Medicine Approach * Clinical Botanical Medicine
Integrative Medicine Approach to Common Acute and Chronic Conditions

COLLEGE OF
INTEGRATIVE MEDICINETM

CHAIR
Longevity & Precision Medicine

Working together to offer quality education to health care professionals

The College of Integrative Medicine is dedicated to offering the highest quality of post graduate education and resources in integrative and functional medicine. By translating the best of science, research, and development into an educational resource that transcends global cultures and promotes multi-disciplinary health care, the College of Integrative Medicine is able to transfer a broader knowledge of integrative and functional medicine to professional health care providers. CIM is proud to work together with Efhre International University and the CHAIR Longevity & Precision Medicine to bring this Master of Integrative & Functional Medicine to you.
